

Whitepaper

The **SPACBUSD** Project aims to create sustainable income before the long term accessible to all investors. You can find us in the channels mentioned below

Website: <https://www.spacbusd.in>

Telegram: https://t.me/Spac_miner

1 - STAKE BUSD

2 - STAKE SPACBUSD

3 - UNSTAKE SPACBUSD

4 - SELL SPACBUSD

5 - TOKENOMICS

6 - PRICING

7 - AIRDROP

1 - STAKE BUSD

- 1 - Open <https://spacbusd.in>**
- 2 - Click "Connect" at the top to connect your browser wallet to the dapp. Please ensure you are on the BSC network**
- 3 - In the "MINT SPACBUSD" section, you will need to approve your BUSD spend with the application (i.e. enter 200 for \$200) and click "Approve". Your browser wallet will popup to confirm the transaction, click Confirm and wait for the transaction to be processed by the blockchain.**
- 4 - In the "MINT SPACBUSD" section, enter the amount of BUSD to enter into the dapp and click "INVEST". Your browser wallet will popup to confirm the transaction, click Confirm and wait for the transaction to be processed by the blockchain. A MAX button has been provided which will enter in the maximum amount of BUSD that you have in your wallet**
- 5 - If you experience high gas fees while investing BUSD then make sure you have approved your spend (step #3)**

2 - STAKE SPACBUSD

- 1 - Open <https://spacbusd.in>
- 2 - Click "Connect" at the top to connect your browser wallet to the dapp. Please ensure you are on the BSC network
- 3 - In the "STAKE SPACBUSD" section, enter the amount of SPACBUSD to enter into the dapp and click "STAKE". Your browser wallet will popup to confirm the transaction, click Confirm and wait for the transaction to be processed by the blockchain. A MAX button has been provided which will enter in the maximum amount of BUSD that you have in your wallet

2

3 - UNSTAKE SPACBUSD

- 1 - Open <https://spacbusd.in>**
- 2 - Click "Connect" at the top to connect your browser wallet to the dapp. Please ensure you are on the BSC network.**
- 3 - In the "STAKE SPACBUSD" section, click the "UNSTAKE" button. Your browser wallet will popup to confirm the transaction, click Confirm and wait for the transaction to be processed by the blockchain.**
- 4 - Note that you can only unstake after 7 days, and each time you restake the time resets to 7 days.**

4 - SELL SPACBUSD

- 1 - Open <https://spacbusd.in>**
- 2 - Click "Connect" at the top to connect your browser wallet to the dapp. Please ensure you are on the BSC network.**
- 3 - In the "SELL SPACBUSD" section, enter the amount to sell and click "SELL". Your browser wallet will popup to confirm the transaction, click Confirm and wait for the transaction to be processed by the blockchain. A MAX button has been provided which will enter in the maximum amount of BUSD that you have in your wallet**

4

5-TOKENOMICS

Total Supply : The maximum amount of SPACBUSD that can exist. This is fixed at 1,000,000

Circulating Supply : The amount of SPACBUSD tokens that is in users' wallets or staked by users.

Available Supply : (Total Supply - Circulating Supply)

BUSD Balance : The BUSD value in the contract

5

6 - PRICING

**SPACBUSD Price : (Total BUSD Balance/
Available Supply)**

BUSD Investments : Using the "SPACBUSD Price" formula, it's easy to derive that as more funds enter the contract the price increases, and as funds leave the contract the price decreases.

Token Minting : Using the "SPACBUSD Price" formula, as users mint SPACBUSD tokens (either by using BUSD or staking SPACBUSD) the Circulating Supply increases (which reduces the Available Supply) which drives the price up.

Token Selling : Using the "SPACBUSD Price" formula, as users sell SPACBUSD tokens the Circulating Supply decreases (which increases the Available Supply) which drives the price down.
